**Subject:** RE: Gordon Creek 2, 7, 8 - 2003 Water Monitoring

Steve:

I have looked through my data files and believe I can answer all of your questions. Following are the responses:

1. DO 6  
Oil and Grease Lab # 59-25089, 3mg/l MRL is 2 mg/l, method 413.1, date time is 2-1-03 at 0800 by jj.
2. There should be data for 2-2-w, 2-8-W and 2-10-w. All others were dry. I'll see what happened to the 2-2-w lab data.
3. I will upload the data for 2-7-w for the first 1/4. It was monitored on 3-28-03 and was dry.
4. I will find the data for 2-8-w in the second quarter. It was monitored on 4-25-03 with a recorded flow of 0.1 gpm.

I'll let you know as soon as I have uploaded the missing data.

Chris

Subject: Gordon Creek 2, 7, 8 - 2003 Water Monitoring

Hi Chris,

I have finally completed the review of the Gordon Creek 2, 7, & 8 water monitoring for 2003. Because of the problems with the data being stuck in the pipeline, etc., I put off reviewing the 2nd, 3rd, and 4th quarters till now. A couple of issues need to be addressed from the review.

- 1) Site 2-2-W is missing dissolved oxygen, oil & grease, and dissolved magnesium for the first quarter.
- 2) No laboratory analytical data was submitted for site 2-2-W for the second quarter.
- 3) Site 2-7-W has no first quarter submittal, although there are two inputs for the second quarter (4/25 and 5/22).
- 4) Site 2-8-W has no second quarter submittal.

Please respond to these issues when you can. If you have data for the missing sites and/or parameters, you can forward it to me and I can have Dana add it to the database. I believe once the data is downloaded out of the pipeline, only she can make edits.

Thanks,

Steve Fluke
